

Steven Williams

Senior Software Engineer | Transitioning to IT Support & Systems Administration

Gulfport, MS 334-301-0929 | steven.williams012083@gmail.com | <https://www.linkedin.com/in/steven-williams-1a0a7a3/> | <https://github.com/muffinman29>

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with 10+ years of hands-on experience in software development, now channeling that expertise into a focused transition into IT Support and Systems Administration. Possesses deep technical knowledge of Windows and Linux environments, networking protocols (TCP/IP, DNS, DHCP), Active Directory, and PowerShell scripting automation — skills built and continuously refined through both professional practice and dedicated lab-based, hands-on learning. Recognized for a strong customer support mindset, sharp troubleshooting instincts, and an ability to translate complex technical concepts into clear, actionable guidance for non-technical users and stakeholders. Enthusiastic about solving real-world IT problems, improving system reliability, and delivering exceptional end-user support experiences in a help desk or systems administration role.

CORE COMPETENCIES

Windows Administration	Linux (Ubuntu)	Active Directory & Group Policy
TCP/IP, DNS & DHCP	Wireshark & Packet Analysis	PowerShell Scripting
Network Troubleshooting	Remote Desktop Support	Virtualization (VirtualBox / VMware)
Help Desk Ticketing Systems	User Account Management	

TECHNICAL SKILLS

Operating Systems	Windows 10/11, Windows Server 2019/2022, Ubuntu Linux, macOS
Networking	TCP/IP, DNS, DHCP, LAN/WAN, firewall basics
Directory Services	Active Directory, Group Policy Objects (GPO)
Scripting & Automation	PowerShell, Bash, batch scripting
Monitoring & Analysis	Wireshark, network packet capture, event log analysis
Virtualization	VirtualBox, VMware Workstation
Ticketing & ITSM	Help desk ticketing platforms (ServiceNow-style workflows)

IT PROJECTS & HOME LAB EXPERIENCE

Help Desk Ticket Simulation

- Designed a simulated help desk environment to practice real-world IT support scenarios across hardware, software, and network domains.
- Documented tickets, escalation paths, and resolutions using ITIL-inspired workflows to mirror enterprise support operations.
- Troubleshoot common issues including network connectivity failures, user account lockouts, and application software failures from initial report through resolution.

Windows / Linux Home Lab

- Designed and maintained a multi-VM home lab environment running Windows Server 2019 and Ubuntu using VirtualBox for hands-on systems administration practice.
- Configured Active Directory domain, DNS, DHCP, and Group Policy Objects (GPOs) across virtual machines to simulate enterprise network topology.
- Practiced system imaging, user provisioning, and OS-level troubleshooting in an isolated, repeatable lab setting.

Network Monitoring with Wireshark

- Captured and analyzed live network traffic to identify anomalies, latency issues, and misconfigured network devices.
- Developed deep understanding of TCP/IP three-way handshakes, DNS resolution processes, and HTTP/HTTPS session behavior through packet-level inspection.

- Documented findings in structured network analysis reports, reinforcing methodical troubleshooting and technical writing skills.

PowerShell Automation Scripts

- Developed PowerShell scripts to automate routine IT administration tasks including bulk user account creation, password resets, and system inventory collection.
- Streamlined repetitive manual processes, reducing task completion time and improving consistency across system management workflows.
- Integrated structured error handling and audit logging to support troubleshooting and compliance requirements.

Active Directory Mini-Lab

- Deployed and configured a full Active Directory environment within a virtualized infrastructure, including domain controller setup and replication.
- Created organizational units (OUs), user accounts, security groups, and applied GPOs to enforce desktop policy management and security baselines.
- Simulated common IT support scenarios — account lockouts, permission conflicts, and login troubleshooting — to build practical resolution muscle memory.

PROFESSIONAL EXPERIENCE

Software Engineer III — Aptarro

Remote | Mar 2017 – Apr 2025

- Led UI development for analytics module of a claim scrubber using **C#, Angular, Bootstrap, SQL Server, Web API, TypeScript**, improving customer retention.
- Spearheaded UI development for Alpha II MIPS product using **C#, Web Forms, ADO.NET, JavaScript**.
- Delivered annual upgrades of critical calculation libraries **four months early** using **Ruby, Rails, React, Postgres, Go, Docker, CircleCI**.
- Improved code quality through best practices in **unit testing** and **code reviews**.

Software Developer — Howard Technology Solutions

Ellisville, MS | May 2013 – Aug 2016

- Built in-house order management system using **C#, SQL Server, Web Forms, Bootstrap**, improving parts-tracking efficiency.

- Led development of a ticketing system using **C#, ASP.NET MVC, Bootstrap, SQL Server, Git**, improving defect tracking accuracy.
- Designed digital signage prototype using **C#, WPF, SQL Server, Kinect SDK**, securing new business.

Software Engineer — Therapy Management Corporation

Hattiesburg, MS | Mar 2011 – Apr 2013

- Developed recruiting and time-attendance applications using **VB.NET, SQL Server, Web Forms, Telerik Reports, Bootstrap**, generating significant cost savings.

Associate 4 — Deloitte Consulting

Hattiesburg, MS | May 2009 – Mar 2011

- Transitioned from QA to .NET development; led test automation initiatives improving testing efficiency.

Application Developer II — BearingPoint

Hattiesburg, MS | Mar 2007 – May 2009

- Taught a six-week automated testing course using **VBScript**, leading to widespread adoption.
- Awarded for developing a **Java application** that analyzed test scripts in Quality Center.
- Documented technical specifications, deployment procedures, and system architecture decisions to support team continuity and institutional knowledge retention.
- Cross trained into the infrastructure team for three months.

EDUCATION

Bachelor of Science, Computer Science

University of Southern Mississippi — 2006

Associate of Arts, Music Education

MGCCC — 2003
